Cubism

Art Nouveau Modern

Expressionism

ABSTRACT

Fine AI art-market history was made on October 25, 2018 when the first artificial intelligence artwork ever sold at Christie's auction house shattered expectations, fetching USD 432,500 <https://www.christies.com/lot/lot-6166184/>. Today, opening the doors to the *AI Art Movement*, **The House of MONTREAL.AI Fine Arts** unveils quintessential AI creations reflecting the aesthetic diversity, the conceptual richness and 'purist' form of AI creativity expressed by the machine.

"The Artists Creating with AI Won't Follow Trends; They Will Set Them." — MONTREAL.AI

1 Pioneering Legendary Creations

In 1953, Wittgenstein introduced its "*language-game*" in **Philosophical Investigations**²: a primitive language is generated from elementary works (ex.: the so-called "*builder's language*"). Now, building on a vocabulary learned from executing works with the greatest art movements, MONTREAL.AI's *Quintessential AI Agent*, a deep neural painter, is capable of exalting the purest one-of-a-kind archetype of significant importance (*only one exists*) of an art movement – **The Quintessential AI Element** (*Impressionism, Realism, Romanticism, Expressionism, Symbolism, and more*).

2 First Quintessential Fine AI Art Auction

First Auctioned item detail: *The 'purist' form of the Cubism art movement*. Deep generative neural painting print, on canvas, 2021, signed with the fundamental deep learning equation in ink by the President of MONTREAL.AI, with original gilded wood frame S. 27 ½ x 27 ½ in (700 x 700 mm.) **Reserve price: USD 230 Million.**

*Founding Chairman at MONTREAL.AI <http://www.montreal.ai>.
