Machine Ω Frontier AI MasterClass

Private Engagement Proposal Template

Not money by magic. A proof-governed productive-capacity flywheel.

No hype. Only proof. Only customer value.

Engagement Summary

Field	Proposed value
Client	[CLIENT]
Executive sponsor	[SPONSOR]
Commercial objective	[OBJECTIVE]
Buyer / market	[BUYER]
Format	[BRIEFING / MASTERCLASS / DESIGN LAB / SPRINT / PROOF-TO-REVENUE RUN]
Date and location	[DATE / LOCATION]
GoalOS lead	[NAME]
Client owner	[NAME]
Fee	[FEE]

Purpose

The engagement converts one legitimate commercial objective into a proof-governed revenue institution. It makes the buyer, outcome, offer ladder, pricing, funnel, capacity, proof burden, reviewers, approvals, reusable capability, and next action inspectable before broader investment or deployment.

Scope

- Executive framing: output, proof, authority, payment, memory, reuse, and compounding.
- One-box business formation and Chief-of-Staff confirmation.
- Four-level offer architecture.
- Pricing, funnel, capacity, and scenario economics.
- Sales asset and human-approval design.
- Day-one operating model.
- Mission Contract, Proof Debt, job queue, and Evidence Docket blueprint.
- Chronicle, Validated Skill, monetization, and reinvestment.
- Executive recommendation and next commercial decision.

Deliverables

Deliverable	Included
Commercial Objective Brief	Yes
Ideal Buyer and Purchase Trigger Map	Yes
Four-Level Offer Ladder	Yes
Pricing and Capacity Model	Yes
Pipeline Funnel	Yes
Initial Target Account List	Yes
Positioning and Outreach Drafts	Yes
Human Approval Map	Yes
Mission Contract	Yes
Proof Debt Register	Yes

Deliverable	Included
Custom AGI Job Queue	Yes
Evidence Docket Blueprint	Yes
Chronicle Admission Test	Yes
Validated Skill Passport	Yes
Capability Monetization Boundary	Yes
Reinvestment Policy	Yes
30-day and 90-day operating plan	Yes
External reviewer work	[Optional]
Completed Governed Decision State	[Optional Proof-to-Revenue Run]

Schedule

Phase	Timing	Output
Pre-work	3–5 business days before	Objective, participants, boundaries, and data.
Live engagement	Per selected format	Draft operating artifacts and recommendation.
Executive recap	Within 24 hours	Decision, blockers, owners, and next gate.
Downstream engagement	Optional	Design Lab, Sprint, Proof-to-Revenue Run, or enterprise program.

Roles and Responsibilities

GoalOS	Client
Provide faculty, facilitator, operating method, application, templates, and agreed artifacts.	Provide sponsor, objective, participants, evidence access, boundaries, and timely decisions.
Protect claim boundaries and preserve unresolved debt.	Identify confidential information and required legal, security, or domain reviewers.
Produce agreed drafts and recap.	Review, challenge, approve, reject, or request repair.

Commercial Terms

- 50% on signature; balance before delivery unless otherwise agreed.
- Third-party data, travel, specialist, and reviewer costs require written approval.
- No guaranteed revenue, positive verdict, deployment approval, or certification.
- Confidential information remains within the agreed boundary.
- No irreversible action or money movement without explicit authorization.
- Client retains final decision authority.

Acceptance

The engagement is complete when the agreed commercial and mission artifacts are reviewable, unresolved assumptions remain visible, human approval boundaries are preserved, and the next commercial decision is recorded.

Approval

For GoalOS	For [CLIENT]
Name: _____	Name: _____
Title: _____	Title: _____
Signature: _____	Signature: _____
Date: _____	Date: _____

Source Lineage and Claim Boundary

- GoalOS Autonomous Money Machine Ω standalone application and release notes.
- GoalOS: Proof-Carrying Autonomy — canonical proof-to-capability operating system.
- GoalOS Mission OS — commercial proof-to-action product layer.
- GoalOS: The Validated Skill Graph — Chronicle-gated reusable capability.
- AEP-001 — proof, evaluation, propagation, and rollback doctrine.
- AGI ALPHA — organizational substrate and verified-work compounding thesis.

Claim boundary

This program teaches and applies a research architecture, commercial operating method, and product pathway. It does not guarantee revenue, certify a system, replace legal, security, financial, medical, regulatory, or domain review, authorize production deployment, or claim achieved AGI or superintelligence. Forecasts are scenarios. Strong claims require real customers, real tasks, Evidence Dockets, baselines, replay, cost and safety ledgers, external validation, delayed outcomes, and independent review.
