

GoalOS Autonomous Money Machine Ω

Machine Ω Frontier AI MasterClass

Participant Workbook

Not money by magic. A proof-governed productive-capacity flywheel.

No hype. Only proof. Only customer value.

How to Use This Workbook

Work on one legitimate business, one buyer, and one expensive outcome. Use concise language. Distinguish evidence from assumption. Mark every unknown that matters. The objective is not to fill every box; it is to produce a credible next action.

Working law

Real demand is paid. Real proof is inspectable. Real capability stays inside scope.

1. Commercial Objective Brief

What do you sell?

Describe the customer-funded outcome in one sentence.

Who buys?

Name the role, organization type, and budget authority.

Purchase trigger

What event creates urgency now?

Cost of being wrong or late

Quantify where possible.

Done condition

What visible, reviewable outcome completes the engagement?

2. Ideal Buyer and Purchase Trigger Map

Economic buyer

Who signs or owns the budget?

Executive sponsor

Who needs the result to succeed?

Users and reviewers

Who uses, challenges, or approves the result?

Disqualifiers

Who should not buy this offer?

3. Four-Level Offer Ladder

Decision Diagnostic

Buyer, outcome, price, duration, deliverables, next gate.

Flagship Proof Mission

Buyer, outcome, price, proof level, deliverables, done condition.

Recurring GoalOS Proof OS

Cadence, recurring decisions, monitoring, evidence, and fee.

Enterprise Proof Institution

Teams, governance, deployment, assurance, and expansion.

4. Pricing, Capacity, and Economics

Core price

State the amount and the value logic behind it.

Monthly target

What revenue target are you modeling?

Delivery capacity

How many engagements can be delivered without quality loss?

Direct costs

Faculty, specialists, reviewers, data, tools, travel, sales, and reserve.

Gross margin hypothesis

Show the formula and assumption.

5. Funnel Model

Qualified leads per month

Lead → call rate

Calls required

Call → proposal rate

Proposals required

Proposal → close rate

Core deals required

Capacity conflict or slack

6. Sales Asset Brief

One-line positioning

Executive outreach email message

Discovery questions

List the questions that expose decision value, evidence burden, authority, and timing.

Proposal structure

Landing-page promise

Ethical follow-up sequence

7. Human Approval Map

Outreach

Who approves recipient, message, channel, and timing?

Public claims

Who checks evidence and claim boundary?

Proposal

Who approves scope, price, terms, and capacity?

Contract and payment

Who may sign, invoice, charge, or release funds?

Deployment

Who authorizes production action, monitoring, and rollback?

8. Mission Contract

Objective and decision to support

Success criteria

Failure criteria

Scope and excluded uses

Proof level

Allowed sources and tools

Required validators

Budget and deadline

Done condition

9. Proof Debt Register

Material claims

List the claims or assumptions that matter.

Classification

Supported / needs evidence / replay / reviewer / boundary / blocked / out of scope.

Impact and irreversibility

Evidence required

Owner and due date

10. Custom AGI Job Queue

Job 1

Source debt, task, worker, validator, deliverables, acceptance tests, blocked claims, ProofBundle path.

Job 2

Job 3

Repair job if proof fails

11. Evidence Docket Blueprint

Claims matrix

Source provenance

Tests and baselines

Contradictions and uncertainties

Risk and cost ledger

Reviewer report and replay path

Public/private boundary

--

12. Chronicle Admission Test

Candidate capability

What method appears worth keeping?

Support strength

Replay / reconstruction readiness

Independent validation

Risk and boundary pass

Decision

Admit / admit with scope / repair / reject / quarantine / retire.

13. Validated Skill Passport

Skill name and version

Allowed scope

Excluded uses

Method and tools

Evidence references

Acceptance tests

Validators

Risk and rollback

Measured utility

14. Capability Monetization Boundary

Sell

License

Reuse internally

Retain as an asset

Open / standardize

Sandbox / retire

Chosen disposition and why

15. Reinvestment Policy

Verified gains available

Product and tools

Allocation %, amount, expected capacity effect.

Data and research

Validators and assurance

Sales and customer success

Security and compliance

Invention reserve

16. Mission 2 Reuse Test

Baseline mission

Reuse mission

Equal constraints

Budget, time, tools, reviewers, and evidence policy.

Measures

Quality, speed, cost, risk, proof leakage, privacy, and reviewer burden.

Pass / fail threshold

17. 30-Day and 90-Day Plan

First 10 days
Freeze buyer, offer, price, case, reviewers, and account list.

Days 11–30
Run discovery and close paid MasterClasses.

Days 31–60
Convert to Design Lab / Sprint / Proof-to-Revenue Run.

Days 61–90
Complete evidence, review, Mission 2 test, and expansion proposal.

Owner, blocker, decision date

Final Commitment

The customer or market we will test

The offer and price we will put in front of them

The proof gate that must pass

The owner and decision date

Source Lineage and Claim Boundary

- GoalOS Autonomous Money Machine Ω standalone application and release notes.
- GoalOS: Proof-Carrying Autonomy — canonical proof-to-capability operating system.
- GoalOS Mission OS — commercial proof-to-action product layer.
- GoalOS: The Validated Skill Graph — Chronicle-gated reusable capability.
- AEP-001 — proof, evaluation, propagation, and rollback doctrine.
- AGI ALPHA — organizational substrate and verified-work compounding thesis.

Claim boundary

This program teaches and applies a research architecture, commercial operating method, and product pathway. It does not guarantee revenue, certify a system, replace legal, security, financial, medical, regulatory, or domain review, authorize production deployment, or claim achieved AGI or superintelligence. Forecasts are scenarios. Strong claims require real customers, real tasks, Evidence Dockets, baselines, replay, cost and safety ledgers, external validation, delayed outcomes, and independent review.
