

MONTREAL.AI

WE JUST LAUNCHED

SKILLOS

AN OPEN-SOURCE PROOF THAT
AI-AGENT WORK CAN COMPOUND.

JOB

Work
gets done.

TRACES

Traces
get captured.

TESTED SKILLS

Traces become
tested skills.

RELEASES

Skills get
released.

BETTER
UNIT ECONOMICS

Agents improve.
Economics improve.

PROOF IS LIVE.

REFERENCE WORKFLOW.
REPRODUCIBLE PROOF.
MEASURABLE COMPOUNDING.

62%

COST
REDUCTION

per job (reference workflow)

62%

TIME
REDUCTION

per job (reference workflow)

+46 PTS

QUALITY
GAIN

(reference workflow)

\$117,700

PROJECTED ANNUAL
SAVINGS

(under demo assumptions)

SEE THE PROOF

montrealai.github.io/skillos/

Live dashboard. Live proof.

OPEN SOURCE

github.com/MontrealAI/skillos

Open code. Open future.

**THE ERA OF SELF-IMPROVING
AI AGENTS HAS BEGUN.**

We build. They compound. We lead.

Skillos is an open-source reference implementation. Results are based on one reference workflow in a controlled environment.
Not financial advice. Not a guarantee of future results. Your results may vary.

THE THESIS

SkilIOS is an open-source proof that AI-agent work can compound.

Jobs become traces. Traces become tested skills. Tested skills improve future work.

MECHANISM

Work -> Trace -> Learn -> Skill ->
Test -> Release

PUBLIC

Live site, repo, proof, docs

NEXT

Pilot 001 with real workflow
metrics

WHAT IS PUBLIC TODAY

LIVE PROOF

<https://montrealai.github.io/skillos/>

GITHUB REPOSITORY

<https://github.com/MontrealAI/skillos>

REFERENCE WORKFLOW

Sales follow-up emails from call notes

AUTOMATION

GitHub Actions verifies, builds, and deploys

ARCHIVE

Permanent public meeting materials

THE COMPOUNDING LOOP

WORK

Agent
completes a
job

TRACE

System
records what
happened

LEARN

Corrections
become
lessons

SKILL

Lessons
become
bounded
updates

TEST

Candidate
must improve
metrics

RELEASE

Approved
versions
improve work

Work stops being disposable and becomes reusable capability.

PUBLIC-SAFE BOUNDARY

Reference workflow. Reproducible proof. Human approval. No guaranteed outcomes.

USE

- Open-source proof
- Reference workflow
- Controlled environment
- Measured improvement

AVOID

- Guarantees
- Unaudited ROI claims
- Financial claims
- High-impact decisions

PILOT RULE

- Agent drafts
- Human approves
- Nothing sends automatically

PILOT 001

The bridge from reference proof to market proof.

WORKFLOW

Sales follow-up emails
from call notes

SIZE

50-100 real jobs

RULE

Agent drafts. Human
approves.

OUTPUT

Aggregated
before/after
metrics

Pilot 001 proves whether the mechanism creates real workflow value.

WHAT WE NEED FROM THE ROOM

1. Approve the public-safe launch message
2. Identify 1-3 Pilot 001 partners or warm introductions
3. Assign pilot, measurement, and privacy owners
4. Agree to publish only safe, aggregated pilot results

THE CLOSE

We are not asking people to believe in a pitch.

We are showing a live reference proof and asking to test one real workflow.

SkillOS proves the mechanism. Pilot 001 proves the market.
