

SkillOS Public Safety and Integrity Posture

Public-safe claims standard

Date: 2026-05-28 Live: <https://montrealai.github.io/skillos/> GitHub: <https://github.com/MontrealAI/skillos>

SkillOS proves the mechanism. Pilot 001 proves the market.

Purpose

This archive is designed for public viewing, meeting use, and long-term preservation.

Boundary

This public archive contains no private customer data, no private commercial terms, no financing materials, no confidential internal strategy, and no sensitive internal arrangements. Current metrics are reference-workflow results, not audited customer results or guarantees of future outcomes.

Use These Words

- open-source proof
- reference workflow
- reproducible proof
- controlled environment
- measured improvement
- human approval

Avoid These Claims

- guaranteed outcomes
- audited customer ROI unless actually audited
- passive income language
- high-impact automated decisioning
- financial, legal, medical, employment, or credit advice claims

Human Oversight

Pilot 001 uses the rule: agent drafts, human approves, nothing is sent automatically.
