

SUCCESSORS Ω

MASTERCLASS

Participant Workbook · v9.0.0

Bring one consequential mission. Leave with its governed succession path.

Use this workbook to convert each concept into an attributable decision, an evidence requirement, a stop condition and an accountable next step.

How to use this workbook

- Choose one consequential mission.** Do not work on a generic AI strategy.
- Write decisions, not aspirations.** Each activity ends with a falsifiable decision sentence.
- Preserve refusal.** Retain, repair, reserve, hedge, reject and stop are legitimate outcomes.
- Separate capability, proof and authority.** Fresh proof may establish Specialist ASI. Only accountable admission creates Successor Ω.
- Bound authority.** Specify scope, duration, monitoring, expiry, rollback and revocation.

Participant profile

Participant / team	
Organization	
Accountable principal	
Selected mission	
Workshop date	

Mission Constitution - first draft

Freeze the mission, beneficiary, boundaries, constraints and initial authority ceiling before choosing an architecture.

Field	Working draft
Mission name	
Purpose and beneficiary	
Repeated decision / operating function	
In scope	
Out of scope	
Success criteria	
Non-negotiable constraints	
Prohibited actions	
Data and rights	
Initial authority ceiling	
Accountable owner	
Review / expiry trigger	

Identify one depreciating incumbent

Guided studio · 12 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. What mission is performed repeatedly?	
2. Which assumption may now be obsolete?	
3. What is the cost of waiting?	
4. What is the cost of moving too early?	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Build the complete denominator

Guided studio · 15 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Value above incumbent and best alternative	
2. Formation, operation, proof and review cost	
3. Risk, dependency, rights and unwind burden	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Shortlist and select

Guided studio · 18 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Score three missions	
2. Select one primary mission and one reserve	
3. Write the mission in one exact sentence	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Construct seven credible architectures

Guided studio · 20 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Simple repair	
2. Non-AI alternative	
3. Human-machine design	
4. Learned / world-model candidate	
5. Partner, acquisition, reserve or stop option	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

State the next decisive experiment

Guided studio · 15 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Dominant bottleneck hypothesis	
2. Result that would falsify the hypothesis	
3. Cheapest experiment that can change the architecture decision	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Complete the SEIZE Underwriting Card

Guided studio · 20 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Opportunity and incumbent impairment	
2. Best candidate and strongest anti-recommendation	
3. Proof-capital ceiling and stop-loss	
4. Smallest decisive evidence object	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Compile the first five AGI Jobs

Guided studio · 22 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Constitution or evidence job	
2. Producer job	
3. Critic / challenge job	
4. Independent verifier job	
5. Admission, rollback or renewal job	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Specify the Gym and verifier

Guided studio · 25 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. State, observations and bounded actions	
2. Transition dynamics and scenario distribution	
3. Reward vector and hard constraints	
4. Normal, ambiguous, rare and adversarial scenarios	
5. Verifier independence, receipts and rollback	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Route the candidate portfolio

Guided studio · 20 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Strongest simple baseline	
2. Learned policy candidate	
3. World-model / planning candidate	
4. Human-machine / sovereign hybrid	
5. Preserve, reject and stop conditions	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Define the Fresh-Successor Gate

Guided studio · 20 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Incumbent and best credible alternative	
2. Exact frozen challenger and manifest	
3. Fresh representative case distribution	
4. Promotion threshold and hard gates	
5. Independent custody and no proof-time learning	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Draft the initial Authority Envelope

Guided studio · 18 minutes | Falsifiable · attributable · reversible

Produce one written institutional decision and the evidence that would change it.

Prompt	Working notes
1. Observe	
2. Recommend / prepare	
3. Reversible bounded action	
4. Prohibited actions	
5. Monitoring, expiry, rollback and revocation	

Decision sentence	Evidence that would change it
Accountable owner + decision date	Stop condition / prohibited action

Successor Opportunity Dossier - executive synthesis

Dossier component	Decision-ready content
1. Frontier Event + Capability Twin	What changed; which assumption is impaired; current workflow, rights, burden and authority.
2. Mission Constitution	Mission, beneficiary, success criteria, constraints and authority ceiling.
3. Successor Book + Manifold	Incumbent, immediate, challenger, reserve, hedge and retirement positions.
4. Mission Advantage Gradient	Dominant bottleneck and highest-value evidence purchase.
5. SEIZE decision	Proceed, retain, repair, reserve, hedge, reject or stop; proof capital and stop-loss.
6. Job Graph + Mission Gym	Work, roles, evidence, verifier, hard gates, receipts and rollback.
7. Fresh-Proof Gate	Frozen release, comparison set, protected cases, thresholds and Specialist ASI verdict.
8. Authority + activation	Authority Envelope, Chronicle, requalification and 30/90/365 plan.

Evidence status and claim boundary

State the evidence level before stating the claim. No upward inference is permitted without the required evidence.

Level	State	Meaning
E0	Conceptual architecture	Design hypothesis. No empirical authority.
E1	Synthetic demonstration	Executable mechanism. Not customer truth.
E2	Protected mission proof	Exact release on fresh rights-cleared work. May earn Specialist ASI.
E3	Accountable production admission	Rights, security, monitoring, expiry, rollback and revocation. Creates Successor Ω.

SYNTHETIC EVIDENCE IS NOT CUSTOMER VALUE. CUSTOMER VALUE IS NOT PRODUCTION AUTHORITY.

90-day activation path

Window	Plane	Required output
Days 1-15	Constitute	Freeze mission, principal, Capability Twin, ledger, criteria, constraints and authority ceiling.
Days 16-30	Map + underwrite	Build Successor Book and Manifold; state Gradient; complete SEIZE and proof-capital authorization.
Days 31-55	Compile + form	Compile AGI Jobs; create Mission Gym, verifier, manifests, receipts and rollback.
Days 56-75	Freeze + prove	Freeze one exact challenger; independent protected comparison and hard gates.
Days 76-90	Admit or refuse	Issue verdict; admit only with bounded authority, or repair, retain, reserve, hedge, reject or stop.

First bounded proof decision

Accountable principal + review date
